

The ALP FFIRS project (ALPine Forest Fire waRning System), a warning system of forest fire in alpine space, is reaching its final phase.

Begun in 2009, ALP FFIRS involved 15 partners from 6 different nations, who worked together on alpine areas fire prevention.

Arpa Piemonte, main one among several partners involved in this project, is organizing at Torino Incontra on June 15th 2012 a final meeting to show the reached results: a chance to share with participants the knowledge accomplished and to provide them with the instruments to become active part in the forests heritage safeguard.

On June the 16th 2012 will be also possible to assist to a Piedmont Fire System operating staff exercise.

In order to attend, it is necessary to subscribe, within the 12th June, filling directly the online form on Arpa Piemonte website [www.arpa.piemonte.it](http://www.arpa.piemonte.it)
